

PlastMa doo – introduction

About us

- Plastma d.o.o. was founded 2002. in City of Backa Palanka, Serbia
- We started as a company involved with service of plastic injection machines, and thanks to our previous experience and expertise, we soon established cooperation with the world's largest manufacturer of plastic injection machines - HAITIAN
- For the past **20 years**, we have been the official representative of HAITIAN for Serbia, Croatia, BiH and Macedonia, and during that time we have delivered **over 1.000 HAITIAN injection molding machines** and established cooperation with over 250 companies in the field of plastic processing on our market.
- In addition to HAITIAN, from the beginning we have also been cooperating with one of the world's largest manufacturers of auxiliary equipment for plastic processing - SHINI
- We have also established successful cooperation with the leading manufacturer of extrusion blowers - the TONGDA company, vertical press - the TAYU company, as well as cooling equipment - the ITECH company.

Our advantages

- Head office on 1,400 m2 with a showroom, a warehouse of spare parts and equipment, as well as a space for professional training
- Our own service team of 15 service technicians, with over 20 years of work experience, quick response and complete technical support
- A complete offer - from an adequate selection of equipment adapted to the needs and requirements of customers, through delivery, assembly and commissioning, to after-sales support and servicing
- Many years of experience and rich references

Our biggest advantage – aftersales and technical support

- Strong and stable team of 15 experienced engineers and technicians, trained in Germany and China
- Value of spare parts on stock cca 60.000 eur + support from German HQ with 6 mil. Euro stock
- Various service contracts with customers according to demand: 24h response time, 24h hotline, strategic pack of spare parts, remote support
- Free of charge support, free of charge training for customers specifically tailored to their needs

Our offer

HAITIAN injection moulding machinery

- The largest manufacturer of injection molding machines in the world, with an annual production of 56,000 injection moulding machines
- A total of over 1,120,000 m² of production space, with 10,000 employees, of which 500 are engineers in the R&D department
- Logistics and service center in Germany, with stock of spare parts and over 200 machines for fast delivery

Coming soon: HAITIAN production base in Ruma, Serbia

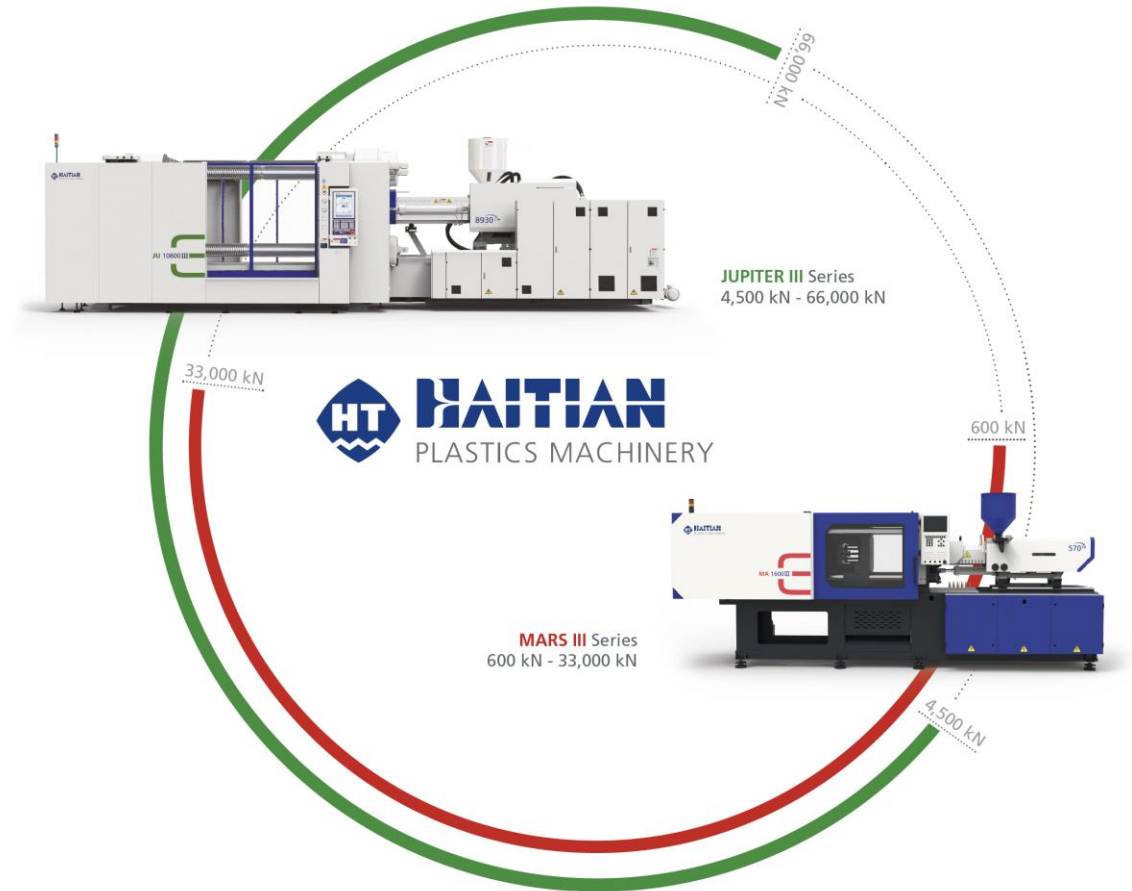

- Factory complex of 100.000 m² on 350.000 m² land
- Will be biggest production base outside China
- Production of injection moulding, die casting, metal processing and auxiliary equipment
- Target annual production 2.500 machine sets
- Training and application center, premium support of local market

Our offer

Servo hydraulic, energy efficient injection moulding machines HAITIAN from 600 to 66.000 kN

- Energy efficient drive, developed and patented by HAITIAN, in the standard equipment package
- Average energy consumption 0.4 kWh/kg
- Modular machine design with a wide selection of additional options
- Simple integration into MES systems
- The best-selling injection molding machine in the world - MARS series, sold over 350,000 units so far

Our offer

Fully electric and hybrid injection moulding machines ZHAFIR from 400 to 33.000 kN

- Exceptional energy efficiency, with an average energy consumption of 0.3 kWh/kg
- Special concepts of machines for ultra short cycles, medicine, automotive industry, two or more component injection molding
- Over 25,000 electric and hybrid machines delivered worldwide to date
- Exceptional precision and repeatability of parameters
- Modular design with a wide range of additional options
- Simple integration into MES systems

Our offer

SHINI auxiliary equipment

- Over 50 years of experience - the SHINI company was founded in 1966
- One of the world's leading manufacturers of auxiliary equipment for the plastics processing industry: 13 large distribution centers, representative offices in 80 countries, 6 production plants in China, including the largest factory for auxiliary equipment in the world SHINI Pinghu at over 405,000 m²
- Complete range of equipment for drying, transport, dosing, recycling, tool tempering and production automation

Our offer

TONGDA extrusion blow moulding

- Over 20 years of experience
- Various series on offer: classic blowers, high-speed models for high productivity, battery blowers for large products
- Built-in components from world manufacturers, a wide range of options (automated lines, additional equipment, energy-saving drive systems).

Our offer

ITECH cooling equipment

- The leading Turkish manufacturer of refrigeration technology, with over 35 years of experience
- Air- and water-cooled chillers with built-in components from global manufacturers, Free Cooling systems for energy saving

NOVAtech

**NTC
SERIES**

Our references

Over **1.000** HAITIAN plastic injection molding machines installed in our market so far

Our references

Logistics and construction: Plastik Gogić Inđija (delivered one of the largest plastic injection molding machines in Europe - JU40000II with 4,000 tons clamping), Peštan Arandjelovac with more than 80 HAITIAN machines, Vargon Rijeka, Valdom Šid
